

{Site Address} Programming {Year}

Survey Date:

Address:

Total SF of house:

Desired Date to be COMPLETED:

Project Budget: {include overall budget}

This programming document will serve as a reference point in the design of this project. You will notice that you have collected the information based on the list in the book per room, and here you are listing the information under major groupings such as flooring, etc and then each room will be notated under that grouping. This is done so that you can easily transfer this information into your budget, it is easier to manage the information via the major groupings if you are dealing with more than one room.

The areas that will be renovated are {sf per room beside}:

1. {List your Rooms, in no particular order but this is the order that you will keep from now on} {SF}
2. ...
3. ...
